Our Origin...

Via Natura (Malaysia) Sendirian Berhad is a grouping of local professionals with skills in varied and specialised disciplines who share a similar goal in sustainable development and environmental conservation.

It was founded in November 1993 to offer specialised professional and scientific consulting services in land use planning, heritage conservation, social impact assessment, and environmental management. Via Natura provides planning, design, and management solutions to achieve the highest environmental quality standards.

Since 2015 Via Natura has expanded its services in providing eco-friendly solutions wastewater treatment, and water recycling.

Via Natura is committed to assist its clients in complying with environmental, land use, heritage and related legislation, to maximise benefits from resource use and conservation; as well as to minimise environmental risks.

Our services cover a broad range of projects, which include development planning, heritage, parks, natural resources, environmental engineering, wildlife ecology, and landscape rehabilitation.

We also provide impact assessment, compliance audit and impact monitoring services.

We are committed to the objectives of Sustainable Development Goals of the United Nations' resolution: ***Transforming our world: the 2030 Agenda for Sustainable Development*** and the ISO 14000

Environmental Quality Standards. That is, to reconcile the world's development, economic, social activities, and governance, with the need to protect the planet; and ensure a sustainable and resilient path to the future for the people, planet and prosperity.

With the combined skills and experience available to the company, Via Natura fills the niche in professional consultancy services to meet both development and conservation objectives.

As our name implies, we seek inspiration and solution **through nature**

Our Mission

To provide a range of services that is ultimately designed to promote conservation and sustainable development.

...& Our Vision

We strive to become the leading consultant in land use, heritage & environmental planning, and management in the region.

Our Services

With a core team of multi-disciplinary professionals, Via Natura is capable of providing the following wide-ranging but interrelated scientific and professional consultancy services.

We have also provided environmental services to regional authorities in Indonesia and Vietnam and our consultants have been engaged as Technical Advisors for international aid agencies such as DANIDA.

Planning, SIA & Heritage Conservation Services:

- ☐ Area character study
- ☐ Cultural mapping & dilapidation study
- ☐ Disaster risk management (DRM)
- ☐ Ecotourism development & management
- ☐ Heritage conservation planning
- ☐ Heritage impact assessment (HIA)
- ☐ Heritage/Conservation management plan (CMP)
- ☐ Land-use planning & master plans
- ☐ Natural resource conservation & strategies
- ☐ Social impact assessment (SIA) & management
- ☐ Sustainability appraisal (SA, SEA)

Eco-solutions & Other Services:

- ☐ Biokube Wastewater Recycling System
- ☐ Biokube STP & Wastewater Treatment
- ☐ Septic Tanks Upgrading System
- ☐ Starlit Solar-powered LED street lighting
- ☐ English-Malay Translation

Our Team

Via Natura's team of consultants and its associates possess a diversity of field experience and strong academic training.

The key personnel represent major areas of specialisation and have proven working experience in both built and natural environment, marine & terrestrial biology, social sciences, engineering, and education. Our consultants have also gained experience overseas and with international organisations.

Via Natura maintains a panel of associates from institutions in Malaysia and abroad from which it can draw skilled individuals in a variety of scientific and professional disciplines.

Via Natura has also established working relationships with other specialised consulting firms and individuals spanning a range of professions that are required in the field of the environmental consultancy.
